# Index to the Montana News Association Inserts

## How to use this index

To search, press **CTRL+F**. Enter a search term and press **ENTER**.

Each entry references a date of publication. The stories themselves appear in chronological order by publication date on microfilm held at the Montana Historical Society Research Center (MF466).

## What are the Montana News Association inserts?

The Montana News Association was a commercial provider of pre-printed newspaper content from 1916-1942. Founded in Great Falls, Montana, by William W. Cheely and H. Percy Raban, the firm paid writers to develop feature stories about Montana. Many newspapers subscribed to the four-page inserts, which enabled them to fill pages with interesting, entertaining content they could not have produced themselves. In 1920, the MNA boasted to potential advertisers that its inserts could be found in more than 100 weeklies reaching 400,000 readers. Most of the authors are not credited, however, some well-known figures are known to have contributed, including artist Charlie Russell and writers Martha Edgerton Plassmann and Grace Stone Coates. Although the inserts included a range of topics, this index covers articles related to 19th–and early 20th–century Montana events and people, for example, interviews, profiles, reminiscences, obituaries of early settlers and other human interest pieces.

## How was the index created?

The index consists of more than 8500 typed cards. It was created in 1981-1983 by Richard Merritt. He wrote:

> The indexer of Montana News Assn. Inserts has frequently noticed errors in dates and in spelling of names and places. Facts can be mixed. This is common in newspaper stories. “Inserts” and this index can be a helpful tool for your research, but please double-check and verify facts.

In 2013, the Montana Historical Society Research Center digitized the cards, creating one uncompressed TIFF per card (300 ppi, 8-bit grayscale). Optical character recognition was performed using Abbyy FineReader, and the OCR text was compiled into a Microsoft Word document. During editing, the entries were checked against the card images and handwritten entries were transcribed. This work was completed in August 2015, when this searchable PDF was generated. The project was managed by Christine Kirkham. Maegen Cook, Catherine Askam, and Natasha Hollenbach served as editors.

****

Crow Indian Reservation (created 1851,Ft. Laramie treaty)
From Absarokee Pioneer – 8 jun 36.
First agency was on Mission Creek (west of Big Timber) (1870). In early '70s it was decided to move to a site on the east Rosebud. The new site was built of adobe in 1875. In 1881 much new building of frame, covered with cottonwood & hand-made shingles- a school, sutler's store, cabins etc. 400 acres of land broken for farming. A catholic mission under a Mexican priest was established. Scaffold burial forbidden. Irrigation ditch constructed. In July '81, Crow Nation starts talks with NPRR about right-of-way, & by 1883 construction was moving rapidly. In 1893 the agency was moved to Pryor Creek when Rosebud & Stillwater Valleys were opened to settlement. This Rosebud is tributary of Stillwater River.
