Walls: WOOD / Weatherboard; GLASS
Roof: WOOD / Shingle
Other: WOOD / Log (tower)

Narrative Description
(Describe the historic and current physical appearance and condition of the property. Describe contributing and noncontributing resources if applicable. Begin with a summary paragraph that briefly describes the general characteristics of the property, such as its location, type, style, method of construction, setting, size, and significant features. Indicate whether the property has historic integrity.)

Summary Paragraph

Gird Point Lookout is a 1931-patten L-4 Lookout House built atop a 10-foot high log tower. It is located at an elevation of 7702 feet above sea level, atop the topographical feature of the same name—the high point in a northeast to southwest-trending ridge system on the west slope of the Sapphire Mountains on the east side of the Bitterroot Valley. The lookout stands on a talus outcrop. On site vegetation is limited to low growing grasses and forbs. The slopes below the lookout once contained stands of subalpine fir, however, most of these were killed during the 1990 Gird Point wildfire. Improvements include the lookout tower and cab, an outhouse in poor condition, a communications pole, and a helipad.

Narrative Description

Gird Point Lookout (contributing building) Gird Point Lookout is a 14-foot by 14-foot wood frame lookout cab with a pyramidal roof built atop a 10-foot high, log tower. The tower and cab are aligned so that they sit at a 45 degree angle to the cardinal directions. Simple drop wood siding covers the lower portion of the exterior walls, and the roof is covered with sawn cedar shingles with metal ridge caps. A metal stove pipe extends above the southeast slope of the roof at its north end. The entry into the lookout house is located at the east end of the southwest-facing wall. A modern wood board-and-batten door has replaced the original multi-light door. Four nine-light windows are located in the wall west of the entry. The remaining three walls each contain five, nine-light, wood windows, two of which slide sideways allowing ventilation. Several of the window panes are missing—the holes covered with cardboard. Each
of the lookout cab’s four walls has two top-hinged shutters; when open, the shutter struts are affixed to the bottom rail of the catwalk railing. The building retains its lightning protection.

The four log legs of the cross-braced log tower are supported by cast-in-place battered concrete footings. A single-flight stairway is located on the southeast side of the lookout tower. The base of the stairway rests on a concrete footing etched with: “Aug. 18 1939.” The stair stringers and treads are made with dimensional lumber. A safety railing on the outside edge of the stairway has been fashioned by attaching hog wire to a dimensional lumber hand rail which in turn is attached to two vertical wood posts. A small wooden storage box is suspended from the base of the cab adjacent to the inside edge of the stair. Originally, the box could be accessed by someone standing on the stair, however, access is now blocked by wire mesh attached to the inside edge of the stair. At the top of the stairway, a trapdoor leads to the catwalk that surrounds the cab. A spring-loaded safety gate is located the north edge of the trap-door opening.

In the one-room interior, the original maple floor is intact and in fair condition. The interior is fitted with a plywood platform bed frame, a metal stand with an Osborne fire-finder, a small wood heating stove, a small table, and a storage bench.

**Outhouse (contributing building)** The outhouse is located roughly 120 feet northeast of the lookout. It is a one-story frame building with a steep shed-style roof. The exterior walls are enclosed with vertical boards. At the time of the survey the outhouse was in poor condition. The roof is missing and the original, Z-braced, vertical board door lay on the ground. The Forest Service intends to replace the outhouse in the near future.

**Helipad (noncontributing structure)** A small helipad is located about 25 feet east of the lookout. It consists of a 10-foot by 12-foot leveled area within a natural talus outcrop that has been paved with concrete blocks.

**Communications pole (noncontributing structure)** A recently-erected peeled log pole, presumably to support communications antennae, is located about 40 feet northeast of the lookout.

**Integrity**

Gird Point Lookout retains all seven aspects of historical integrity. The lookout is in its original location, in a remote area accessible by both two-track road and by pedestrian trail. Its remoteness in turn contributes to its exceptional integrity of setting, feeling, and association. The lookout building and tower retain integrity of materials, workmanship and design. Although the log tower legs were replaced during a restoration in 2003, the replacements were in kind; the catwalk was also rebuilt and the roof reshingled at this time. The lookout stands as an exceptional example of the once-common 1931-pattern L-4 Lookouts once included in the Bitterroot National Forest’s fire detection system. A flagpole, present in 1982, has been removed from the site.

8. Statement of Significance

Applicable National Register Criteria
(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- [x] A. Property is associated with events that have made a significant contribution to the broad patterns of our history.
- [ ] B. Property is associated with the lives of persons significant in our past.
- [x] C. Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- [ ] D. Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations
(Mark “x” in all the boxes that apply.)

- [ ] A. Owned by a religious institution or used for religious purposes
- [ ] B. Removed from its original location
- [ ] C. A birthplace or grave
- [ ] D. A cemetery
- [ ] E. A reconstructed building, object, or structure
- [ ] F. A commemorative property
- [ ] G. Less than 50 years old or achieving significance within the past 50 years

Statement of Significance Summary Paragraph (Provide a summary paragraph that includes level of significance, applicable criteria, justification for the period of significance, and any applicable criteria considerations.)

Gird Point Lookout is eligible for listing in the National Register of Historic Places under criteria A and C, at the local and state level of significance. Under Criterion A, it is significantly associated with the US Forest Service’s early fire detection program, which relied on a series of fixed lookout points from which to locate forest fires. Under Criterion C, Gird Point Lookout is an excellent example of a 1931-pattern L-4 Lookout House.

Gird Point Lookout meets the Registration Requirements set forth in the L-4 Fire Lookouts in the USFS Northern Region (Region 1), 1932-1967 Multiple Property Document and the associated contexts The Role of the L-4 Lookout House in the Development of the US Forest Service Region I’s Fire Detection System, and L-4 Lookouts on the Bitterroot National Forest. The period of significance for the Gird Point Lookout is 1937-1967, within the defined period of significance of the MPD cover form, 1932-1967. The Bitterroot National Forest added Gird Point Lookout to its fixed point fire detection system in 1939, the start of the lookout’s period of significance, and used it through 1967, the end of the historical period as defined in the MPD cover form. It is currently used as a cabin rental.

Narrative Statement of Significance (Provide at least one paragraph for each area of significance.)

The Bitterroot National Forest identified Gird Point as a lookout site sometime prior to 1933, when it appeared on a base map for the forest, along with five other lookout sites in the Darby District. The

others included: Skalkaho Mountain, Bald Top, Black Bear Point, and Deer Mountain (all located in the Sapphire Mountains on the east side of the Bitterroot Valley) and Ward Mountain located in the Bitterroot Mountains on the west side of the valley.¹ Gird Point was rated as an “average season” lookout. In 1937, Elers Koch identified seven lookout points on the Darby District, none of which had been improved to current standards.²

Gird Point received its first and only major improvements in 1939. Like Medicine Point Lookout on the Sula District to the south, Gird Point is believed to have been built with Civilian Conservation Corps (CCC) labor—probably under the direction of an experienced carpenter. The two lookouts both have dates inscribed in the concrete footings at the base of the single-flight stairs, indicating that Gird Point was under construction on August 18, of 1929, and that Medicine Point was being built in September of 1929.

During the region’s lookout replacement program of the 1950s, Gird Point was one of the structures inspected for possible replacement. At the time, it was classified as an “overload, temp” lookout, i.e., one manned only during extreme fire seasons. The inspector noted that while the lookout cab needed new beds and cabinets, with proper maintenance, the structure had an estimated “20 years of safe life.”³ In 1967, Gird Point was listed as one of sixteen lookouts manned on the Bitterroot National Forest. Two other Darby District lookouts, Ward Mountain and Deer Mountain, also were manned that year.⁴ By 1992, the Bitterroot manned only ten lookouts, and Gird Point was not among them. The only Darby District lookout used during that year was Deer Mountain, which by that time had been improved with a frame and concrete, flat-topped lookout built in 1960.⁵

After being abandoned for nearly two decades, the forest began restoration of Gird Point Lookout in 2003.⁶ During the restoration, the log tower legs were replaced in kind and the catwalk rebuilt. A new wood shingle roof was installed and the exterior of the building painted. The project took three years to complete, and in 2003 Gird Point Lookout was added to the forest’s cabin rental program.

1. Zone: 12  Easting: 0275401 m  Northing: 5121220 m

Verbal Boundary Description (Describe the boundaries of the property.)

The boundary of this property is an arbitrary line drawn to encompass the top of the rocky knob containing the lookout and associated resources.

Boundary Justification (Explain why the boundaries were selected.)

The boundary encloses the primary improvements at this location, namely the lookout house and tower and the ruins of the outhouse.
